Questions
How to display output?
What is the formula?
Error message?

General Rules
User must enter an integer
Calculation
Output format: WW DD HH MM SS

Calculation of weeks
Calculation of days
calculation of hours
calculation of minutes
calculation of seconds

--note: remainder gets calculated next

Input number

put output into variable

Processing: Formula

While remainder >0

Output 1

Save

Output 2

Saved

Output 3

Save

Output 4

Save a

Output 5

Save as

Final output: WW D
SS

While remainder > 0, then calculate again
When remainder=0, finished and display
output

as weeks

d as days

as hours

s mins

seconds

D HH MM
